El polémico **COOL IT!** de **Bjorn Lonborg**. (En frío. **Guía del Ecologista escéptico para el cambio climático, Espasa Calpe, 2008**). Lonborg ha sido justamente criticado por su interesada simplificación de los problemas ambientales para desacreditar fácilmente a las actitudes y políticas ambientales, en su best seller: *el Ecologista Escéptico*. Curiosamente Bjorn ha criticado duramente en la prensa, por razones muy semejantes, la concesión del Nóbel de la Paz de 2007 a Al Gore.
